Saeed Al-Haj Hussein

Front-End Web Developer | React.js

Location: Masyaf, Hama, Syria, **GitHub:** @Sa3ed-031, **LinkedIn:** @sa3ed-al-haj-hussein, **E-mail:** saeedalhajwork@gmail.com,
Portfolio: sa3ed-031.github.io

Professional Summary

Front-End Web Developer specializing in React.js and TailwindCSS, currently completing a Bachelor's degree in Software Engineering at Homs University. Experienced in building responsive, component-based web apps, production-style projects with role-based access control. Comfortable working across the full front-end lifecycle: UI design, state management and API integration.

Projects

ZMovie Website: - Live
A movie/TV discovery platform built with the TMDB API, featuring dynamic browsing, filtering, and a watchlist system
- Built homepage, movies/TV-shows, search, trending, and watchlist pages with a structured React folder architecture.
- Implemented multi-tab filtering (popular, top-rated, airing-today) and a dynamic "latest release" homepage banner.
- Built a reusable Pagination component (using MUI) to handle large result sets, a custom useFetch hook to centralize API data-fetching.
- Organized all API requests into a dedicated api layer for maintainability; watchlist currently persisted via Local Storage.

Tech stack: React.js, TailwindCSS, Axios, Material-UI, Local Storage.

Rennello Platform: - Live
4th-year project (team of 6) - a platform connecting customers with local service workshops, with full RBAC for customers, workshop owners, and admins.
My contribution as Frontend Developer:
- Built the main homepage and the complete registration & login flow, including all related sub-pages.
- Developed the entire user (customer) route/flow across the platform.
- Built the request-details pages for both customers and workshop owners, covering status tracking (pending, approved, active, complete).
- Built the "My Workshop" management page for workshop owners.

Tech stack: React.js, Redux, TailwindCSS, Material-UI, Framer Motion (frontend) - Laravel & MySQL (backend, by teammates).

Archi Carpenter – Company Website: - Live
A business website for a woodworking/carpentry company, showcasing services and past work with lead-generation forms
- Used react-router to build a homepage, services, projects, contact and about page routes.
- Used CSS & Media queries to style modern and responsive web pages.
- Used Leaflet (an embedded location map) in the contact page.

Tech stack: React.js, CSS, Material-UI, Leaflet (interactive map), GSAP (animations).

WhatsApp Clone: - Live
A UI and functional clone of WhatsApp's core chat experience
- Designed and built the full UI flow across +10 pages (welcome, add-number, login/register, user page, chat & group info).
- Implemented a data model with a global users array, unique per-user chat lists (by ID), and per-chat message threads.
- Built group creation from existing chats, with broadcasting messages across group members.

Tech stack: React.js, CSS, Material-UI, Local Storage.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3.
- **Frameworks & Libraries:** React.js, Redux, React Router, Tailwind CSS, Material-UI, Framer Motion, GSAP.
- **Backend & APIs:** Firebase, REST APIs, Axios, EmailJS, Leaflet.
- **Tools:** Git, GitHub, GitHub Actions, Vite, Netlify, VS Code.
- **Concepts:** Responsive Design, Component Architecture, State Management, RBAC, SEO.
- **General Knowledge:** Basic knowledge in computer systems and network fundamentals.

Soft Skills

- **Teamwork and Collaboration**
- **Time Management**
- **Adaptability & Eager to Learn**
- **Passion & Creativity**

Languages

Arabic: Native. **English: Intermediate.**

Education & Courses

Bachelor of Software Engineering - Homs University **(2022 - present)**
- **Meta Front-end developer: in-progress.**
- **JavaScript Bootcamp: Elzero.**
- **React.js: Tarmeez Academy.**
